

Instructions for Submitting Phishing Email

Assuming you use Outlook or Netscape:

1. Create a new mail to reportphishing@canarabank.com or cbgimb@canarabank.com
2. Drag and drop the phishing email from your inbox onto this new email message In Netscape drop it on the 'attachment' area
3. Do not use "forward" if you can help it, as this approach loses information and requires more manual processing. The exception is when you use the Web interface to outlook: in that case forward is the only solution.
